

1) Get the List of Open weight LLM from different service providers

- a) Open ai
- b) Qwen
- c) Deepseek

Openai:

- 1. gpt-oss-120b
- 2. gpt-oss-20b

Qwen:

- 1. Qwen3-0.6B
- 2. Qwen3-1.7B
- 3. Qwen3-4B
- 4. Qwen3-8B
- 5. Qwen3-14B
- 6. Qwen3-32B
- 7. Qwen3-30B-A3B
- 8. Qwen3-235B-A22B

Deepseek:

- 1. DeepSeek-V4-Pro
- 2. DeepSeek-R1
- 3. DeepSeek-R1 Distilled Series
- 4. DeepSeek-V3
- 5. Janus
- 6. DeepSeek-Prover Series

2) Hallucination check for the below prompt

Write a 4-line poem where every line ends with a word that strictly rhymes with the word 'Silver'.

ChatGpt:

Strict rhymes for **“silver”** are extremely rare in English; **“chilver”** (an archaic word for a young ewe) is one of the few.

Silver Rhyme

Moonlight rests upon the hills, a quiet chilver

Stars tremble softly over fields, pale chilver

Dawn waits beyond the mist, gentle chilver

Night folds into dreams, bright chilver

If you mean **four different ending words**, English doesn't really provide four standard strict rhymes for *silver*.

Qwen AI:

Thinking completed

The autumn leaves begin to shiver, Reflected in the glassy river, I feel my weary spirit quiver,
Like a sharp and stinging sliver

Gemini AI:

The moonlit stream flows on forever, Past weeping willow, wood, and wiver, While phantom shadows
start to shiver, Reflected in the rushing **quicksilver**.

DeepSeek AI:

Using *chilver*—an archaic word for a ewe lamb and the only strict rhyme for “silver”:

No common word can rhyme with silver, save chilver;
It names a rare old ewe-lamb, chilver.
So I end each line with chilver,
And close this poem with chilver.

3. From open router take the model details with Context window for any 10 models from 3 service providers

<https://openrouter.ai/models>

Provider	Model Name	Context Window
Open AI	GPT-6 Astra (batch)	1.05M tokens
Open AI	GPT-6 Astra	1.05M tokens
Open AI	GPT-6 Astra Pro (batch)	1.05M tokens
